Instructions: Answer all questions

Time: 1 hr.

Total Marks: 50

01. Rough Bark Disease (RBD) of cinnamon is a major stem disease affecting the tree bark. There is a clear research gap on the etiology of the disease. Propose a **detailed research plan** to address this research gap.
(25 marks)
02. Discuss the **significance** of the knowledge of host-vector-environment-virus interactions in plant viral disease control.
(25 marks)
